CHIEF COMPLAINT

Neck pain and low back pain after motor vehicle collision.

HISTORY OF PRESENT ILLNESS

38 y/o F, restrained driver, rear-ended by a tractor-trailer while stopped in traffic on I-215 N. Airbags did not deploy. Arrived by ambulance in cervical collar.

Reports neck and low back pain 7/10 with tingling down the left leg.

No loss of consciousness. Denies head strike, chest pain or abdominal pain.

PHYSICAL EXAM

Cervical paraspinal tenderness without midline step-off. Lumbar paraspinal tenderness, left greater than right. Strength 5/5 in both lower extremities. Patient reports decreased sensation over the left lateral calf.

PLAN

CT cervical spine without contrast per NEXUS criteria.

Ketorolac 15 mg IM given for pain. Reassess after imaging.

HISTORY

Patient seen for low back pain radiating to the left calf since a motor vehicle collision on 03/14/2026. Pain worse with sitting and bending.

EXAMINATION

Lumbar flexion limited to 40 degrees by pain.

Straight-leg raise positive on the left at 40 degrees; negative on the right.

Diminished light-touch sensation in the left L5 dermatome. Reflexes symmetric.

ASSESSMENT

Lumbar radiculopathy, left (M54.16). Cervicalgia (M54.2).

PLAN

MRI lumbar and cervical spine without contrast. Physical therapy three times per week. Lumbar orthosis dispensed.

Work status: modified duty, no lifting over 10 lb, until re-evaluated.

INTERVAL HISTORY

Returns after six weeks without care due to family obligations.

Low back pain 6/10, left L5 radicular symptoms persist.

EXAMINATION

Straight-leg raise positive on the left at 45 degrees. Strength 5-/5 left extensor hallucis longus.

PLAN

Repeat transforaminal injection. Discussed surgical and non-surgical options. Follow up in eight weeks.

Work status: modified duty continues.

HISTORY

Five months of conservative care including physical therapy and two transforaminal injections, with only temporary relief.

ASSESSMENT

Persistent left L5 radiculopathy from L4-L5 disc protrusion, refractory to conservative treatment.

RECOMMENDATION

Recommend left L4-L5 microdiscectomy.

Estimated cost of surgery including facility, surgeon and anesthesia: $98,000.

Risks, benefits and alternatives discussed. Patient wishes to proceed when cleared.

CAUSATION

Within reasonable medical probability, the L4-L5 injury and the need for surgery are the result of the motor vehicle collision of 03/14/2026.
